Could you help with a research study about Type 2 diabetes?

Research in Newcastle has shown that Type 2 diabetes can be reversed to normal. Professor Roy Taylor's team is now testing whether this is also possible for non-obese people with type 2 diabetes.

We are looking for people with Type 2 diabetes of less than 6 years duration for a 1 year research study. Individuals should be non-obese (BMI<27) and aged 20-70 years. If you fit these criteria we would be very pleased to hear from you.
